INDEX, VOLUME 24, 1986

Number 1

Contributed Papers

One-Period Order Quantity Strategy with Uncertain Match Between the Amount Received and Quantity Requisitioned
A. HAMID NOORI and GERALD KELLER / 1

Quantity Discounted Inventory Replenishments with Limited Storage Space
AMIYA K. CHAKRAVARTY / 12

Age Replacement Policy with Age-Dependent Minimal Repair
MENACHEM BERG, MICHEL BIENVENU, and ROBERT CLEROUX / 26

Minimum Number of Arcs in Conditional Monte Carlo Sampling of Stochastic Networks
BAJIS DODIN / 33

A Virtual Machine Design for Nest-Free Programming
B. STRAMM and D. HUGHES / 45

Experience with Translating Euclid to Ada
DAVID T. BARNARD, DAVID A. LEESON, and GLENN H. MACEWEN / 59

Number 2

SPECIAL ISSUE

Microcomputers in Forecasting and Decision Support

Trends in Forecasting on Microcomputers
SPYROS MAKRIDAKIS and DAVID J. WRIGHT / 82

Contributed Papers

Kalman Forecasting in a Decision Support System
DAVID J. WRIGHT / 85
Comments on "Kalman Forecasting in a Decision Support System"
NIGEL MEADE / 95
Comments on "Kalman Forecasting in a Decision Support System"
PIETER W. OTTER / 97

Comments on "Kalman Forecasting in a Decision Support System"
T. SASTRI / 98
Author's Reply
DAVID J. WRIGHT / 99

Corporate Planning and Optimization Models: Integrative Aspects and Microcomputers
JOHN J. DINKEL and WILLIAM L. FUERST / 101

The Decision-Making Process of Small Business for Microcomputers and Software Selection and Usage
ESSAM MAHMOUD and NARESH MALHOTRA / 116

A Visual Interactive Decision Support System for Workforce (Nurse) Scheduling
PETER C. BELL, GENEVIEVE HAY, and Y. LIANG / 134

Microcomputer-Based Simulation Approach to Facility Overbooking
MARIO T. TABUCANON and LISA R. TAN / 147

Using Compact and Portable Function Minimization Codes in Forecasting Applications
JOHN C. NASH and MARY WALKER-SMITH / 158

Application of Information Economics Paradigm and Empirical Approach in the Evaluation of Microcomputer-Based Decision Support Systems
HOSSEIN SHALCHI / 169

Number 3

SPECIAL ISSUE ON COMMUNICATION SYSTEM PERFORMANCE

Editorial: Special Issue on Communication System Performance
C. MURRAY WOODSIDE / 183

A New Method for Computing the Normalization Constant of Multiple-Chain Queueing Networks
A.E. CONWAY and N.D. GEORGANAS / 184

Time-Dependent Analysis of Queueing Systems
SATISH K. TRIPATHI and ANDRZEJ DUDA / 199

A Solution for Multiserver and Multiclass Open Queueing Networks
GUY PUJOLLE and WU AI / 221

Inhibitor *D*-Timed Petri Nets and Performance Analysis of Communication Protocols
WLODZIMIERZ M. ZUBEREK / 231

Number 4

Contributed Papers

Maximizing the Benefits of Canadian Forces Equipment Overhaul Programs Using Multi-Objective Optimization
K.H. MITCHELL and MAJOR G. BINGHAM / 255

Optimal Bidding Policies for Civil and Mechanical Engineering Contracts
YASH P. GUPTA, A.Z. KELLER, and R.H. BOR / 265

Multiple Queues of Aircraft under Time-Dependent Conditions
JAMES H. BOOKBINDER / 280

A Survey of Operations Research in Canadian Companies
H.A. EISELT, G.R. EISELT, and C.-L. SANDBLOM / 289

Time-Tabling Problems: Should They Be Canonical?
D. DE WERRA, C. PASCHE, and A. PETTER / 304

Waiting-Time Moments in the Queueing System $GI/M^{a,b}/1$
B.R. MADILL and M.L. CHAUDHRY / 309
